

Attaching the Squib sticker to a vehicle

1. Take the Squib car sticker

2. Find a suitable position for it, not obscuring the drivers vision.
3. From the *INSIDE*, clean the window where you want the sticker, using an alcohol free cleaning solution and a lint free cloth.
4. Peel the sticker from the backing as shown:

5. Now, peel the sticker off the backing completely.
6. Hold the sticker with the white side facing you and touch the other side on the *INSIDE* of your window (where you have cleaned).
7. Now, working from the centre outwards, rub it onto the window, ensuring that there is no air bubbles or creases.
8. There you go, your Squib sticker is affixed to your vehicle, perfect to promote the class!
